

Tongue And Groove Timber

ECC Tongue and Groove (T&G) Timber - for use in gardening and landscaping applications. The simple T&G profile allows for quick assembly and build of garden structures, whilst the 47mm thickness provides security and robustness when used for division of areas such as gardens, play areas and private yards.

Common uses - construction of Garden Boxes, Compost Boxes, inserting between concrete H posts, Garden Fence Panels and Garden Sheds. T&G can be erected horizontally or vertically.

ECC Tongue & Groove
