## **ECC Chain of Custody Certification – FSC® & PEFC**

### **Dual Certification**

- ECC is fully certified for FSC (Forest Stewardship Council®), certificate code: TT-COC-003859 and PEFC (Programme for the Endorsement of Forest Certification), certificate code: BMT-PEFC-1527.
- ECC can make the full claim for both certifications as normal:
  - All timber sold by ECC is FSC Certified (FSC Mix 70%)
  - All timber sold by ECC is PEFC Certified (70% PEFC Certified)
- ECC customers have the option to claim for either FSC or PEFC individually or alternatively they can make a claim for combined certification (FSC & PEFC) on all timber sold by ECC.

### **On-product Labelling**

#### **On-Product, Wrapping & Packaging**

- ECC products are allowed to bear the FSC Certified logo ONLY. This includes on-product labelling and all product wrapping/packaging material.
- PEFC labels/claims of any kind are not permitted on-product as FSC does not allow any labels from other forest conformity assessment schemes to appear on-product beside their label. This also applies to wrapping and packaging.
- PEFC do not require their logo to be printed on-product as part of certification.

### **Invoices & Company Literature**

- All ECC Invoices and company literature carry the combined claim of FSC certified and PEFC certified.
- All ECC Invoices and company literature also carry a FSC logo and a PEFC logo.
- This does not impact on ECC customers who claim for FSC or PEFC individually.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'Rafal', is written over a light blue horizontal line.
